

## Alkan Makes Soap Bad for Washing Hair

Most soaps and prepared shampoos contain too much alkali, which is very injurious, as it dries the scalp and makes the hair brittle. The best thing to use is just plain refined coconut oil, for this is pure and entirely greaseless. It's very cheap, and beats the most expensive soaps as anything else all to pieces. You can get this at any drug store, and a few ounces will last the whole family for months. Simply moisten the hair with water and rub it in, about a teaspoonful is all that is required. It makes an abundance of rich, creamy lather, cleanses thoroughly, and rinses out easily. The hair dries quickly and evenly, and is soft, fresh looking, bright, fluffy, wavy and easy to handle. Besides, it loosens and takes out every particle of dust, dirt and dandruff.

## How Much Do Your Clothes Cost?

The clothes are the answer to that question, not the price. If you figure cost by the month or year, you'll find that a suit of all-wool cloth, finely tailored, and well designed, gives long wear and in the end costs less than one that doesn't last long or look right. Our clothes are economical because we sell only the best makes.
